- Huge and practical storage – 114 L capacity
- Large, watertight glove box and separate phone storage
- Adventurous new styling, colours and graphics
- Convenient self-draining footwells
- Easier re-boarding with more comfortable step
- Extended re-mount platform with Hydro-Turf mats
- Tow hook and large integral mirrors

Level up

The new VX Cruiser HO is at the very top of the VX range with the most powerful engine of the family. Four cylinders and 1.8 litres of high output for the purest excitement are combined with exceptional cruising luxury for those where compromise is not an option.

Many factors have played a part in making the VX models our most sought-after watercraft, but it is their true versatility that has won such a loyal following, with an impressive performance repertoire that can take you from the adrenaline-pumping excitement of watersports to the relaxing world of waterway cruising.

The new VX Cruiser HO really is the stand-out premium watercraft in this segment, delivering a potent blend of high-performance excitement, precision handling, riding comfort and outright style. For the ultimate cruising experience, bet on the VX Cruiser HO.

4.3" multi-function colour display with fast access

Among its many talents, this clear and easy-to-read display helps you control and monitor all the systems on board, using the fast-access buttons next to the handlebar. Top speed and acceleration limits can also be entered from here, along with the PIN-activated learning and security settings. We put the latest technology to work for you.

More comfortable seat design and better handling

Both the super-comfortable, three-person CRUISER seat and the handlebar of the VX are new, narrower designs that provide excellent ergonomic sitting and driving positions. Together with the deeper, wider footwells and new-design grips, this gives (especially to the smaller rider) great control over the handling.

Integral audio system takes your tunes on the water*

The VX Cruiser HO has another special talent – it can turn into a concert hall, thanks to its fully integrated, factory-installed Bluetooth sound system. The speakers are ideally positioned in the footwells and controlled from an easy-access panel next to the handlebar. A low-voltage regulator is fitted to protect the battery. *Selected units only

RiDE system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE system transforms your riding pleasure, bringing a new feeling of confidence to every rider at every level. Simply pull the lever on the right hand-grip to move forward and accelerate. Pull the lever on the left hand-grip to slow down or reverse. Yes, with the bonus of Reverse Traction Control, it really is that simple.

High Output, DOHC, 16V, 1,812cc engine

The VX Cruiser HO is powered by our High Output, innovative four-cylinder 1,812cc WaveRunner engine. This remarkable unit packs a real punch and offers extraordinary acceleration and great top-end power, but with economy and reliability.

Extensive and practical storage facilities (114 litres)

The latest VX has ample amounts of stowage space so that you can take everything you need along with you. Not only is there huge under-seat and bow storage, but in addition, the very large, watertight glove box has blue LED accent lighting, USB and 12V outlets and even a handy space to secure and charge your phone.

Engine
